

**IGAMING CORPORATION (FORMERLY DPC BIOSCIENCES CORPORATION)
ANNOUNCES THAT IT HAS RECEIVED CONDITIONAL APPROVAL TO RESUME
LISTING AS A TIER 2 TSX-VENTURE ISSUER**

VANCOUVER, BRITISH COLUMBIA, September 6, 2006 – (TSX Venture Exchange: new trading symbol IGA; (to replace DPC.H upon reactivation))

iGaming Corporation, formerly, DPC Biosciences Corporation (“iGaming” or the “Corporation”), a company that has been fundamentally inactive since 2001, is pleased to announce that it has received conditional approval of the TSX Venture Exchange (the “Exchange”) and the approval of the Corporation’s shareholders (at the Annual and Special Meeting of the Corporation’s shareholders held in Toronto on August 24, 2006) to reactivate (the “Reactivation”) such that the Corporation’s common shares resume trading on the Exchange forthwith upon receipt of the Exchange’s final approval.

Management’s plan of Reactivation involved the Corporation completing an arm’s length agreement with a third party to acquire certain assets that derive revenues from the online sale of fact-based and opinion-oriented information related to the gaming industry (the “Acquisition”), the closing of an equity private placement of \$4,350,000 (the “Private Placement”) and proceeding with a name change to iGaming Corporation (the “Name Change”). The Acquisition, the Private Placement and the Name Change have all been concluded and have received the Exchange’s conditional approval.

As announced in a Press Release issued earlier today, James Ryan CA, C.E.O. of Excapsa Software Inc., one of the leading software development companies whose shares are traded publicly on the AIM Exchange (UK), Robbie Manis CA, present C.F.O. of the Corporation and of a private merchant bank, and David Souaid, a senior officer with Optimal Payments Inc. were elected to the Corporation’s board at the recent shareholders’ meeting and will join the incumbent directors Christopher S. Kape and Morden C. Lazarus who were re-elected to the Corporation’s board. The aforesaid addition of James Ryan to the board fulfilled the Exchange’s requirement relating to the addition of another director with suitable public company experience and financial acumen.

As a result of the Acquisition, the Corporation’s business model will involve deriving revenues from the marketing of online, information-based products and services that are ancillary to the gaming industry. The Corporation’s business model will not involve the carrying on of a gaming facility or accepting wagers directly or indirectly from consumers.

Previously the Corporation had been involved in the biotechnology industry (under the name DPC Biosciences Corporation). In 2001, the Corporation sold all of its principal assets to third party purchasers, and remained largely inactive. In February, 2006, a management team consisting of Morden C. Lazarus, Christopher Kape and Robbie Manis set out to utilize their collective core competencies and experience in the area of online marketing and servicing of online providers in the gaming industry (with a specific focus on functions incidental to actual gaming operations).

The assets which have been acquired by the Corporation service the online sports information market by providing timely information, editorials, handicapping advice and consulting to its consumers; all with a view to providing the online gaming customers with value-added information in order to make more informed wagering decisions. The assets include over 250 domain names, seven (7) fully active and revenue generating web sites, a client-server subscription-based sports information services platform, various "back-end" software programs that were developed and are being operated to create or update the acquired assets and the rights to market several notable sports handicappers.

The more notable of the websites that the Corporation acquired are JimFeist.com, PicksOnline.com, Vegasonlinesports.com, OffshoreConnection.com, FurturesandProps.com and ScoresLinesPicks.com. In addition, Sportstracker, a state of the art, real-time sports information system for the more serious bettors and handicappers, is also included among the acquired assets.

C.E.O., Christopher Kape stated, "Management recognizes the enormous market potential which lies from providing services to the Internet gaming consumers and providing consumer leads to the online gaming operators. We are an intermediary amongst these two groups, providing the consumer with valuable information and providing the operators with leads to grow their businesses. Given Management's knowledge, skills and experience in this field, we are excited about the prospects for iGaming going forward."

"The assets which were acquired will also have the ability to generate revenue from an advertising model targeting online wagering facilities that has yet to be implemented, but is integral in Management's decision for their acquisition. Management intends to pursue these relationships with various land-based and online gaming operators. The relationships contemplated will generate revenues from flat fee advertising arrangements", stated Morden C. Lazarus, Chairman.

The purchase price paid by the Corporation for the acquired assets is a maximum of CAD\$1,800,000 payable in the form of CAD\$500,000 in cash and CAD\$1,300,000 via the issuance from treasury of up to 6,500,000 common shares of the Corporation at a deemed price of CAD\$0.20 price per share (with 5,500,000 shares payable immediately and the remaining 1,000,000 shares to be paid upon the assets achieving certain revenue targets within one year of Reactivation).

Management advises that the purchase price of the acquired assets was determined by calculating the aggregate gross revenue generated by such assets in 2005 (as provided to the Corporation on an unaudited basis) and multiplying by a factor of 1.2. Management has determined that such multiple (and the resulting purchase price) is fair market value and consistent with industry standards.

In conjunction with the Reactivation, the Corporation closed a brokered Private Placement of 21,750,000 Units at CAD\$0.20 per Unit to raise CAD\$4,350,000.

"The net proceeds of the funds raised will be used as the cash portion of the acquired assets as well as to fund the development of the infrastructure of the Corporation. In

addition, upon the closing of the Private Placement, the Corporation will be in a position of having a debt-free balance sheet and will be in a strategically advantaged position to seek out and acquire additional businesses and/or assets that service our target markets”, stated Mr. Kape.

Each Unit issued pursuant to the Private Placement consists of one common share and one-half of one common share purchase warrant. Each full warrant entitles the holder to purchase one additional common share at a price of \$0.30 per share for a period of eighteen months after the closing of the private placement. The Corporation, however, will reserve the right, but not the obligation, subject to the forwarding of a fifteen days’ written notice, redeem for cancellation all warrants issued under the Private Placement (for a redemption price of \$0.001 per warrant) at any time after the Corporation’s listed common shares have been trading at a daily close of not less than \$0.40 for fifteen consecutive trading days.

The common shares forming a part of the Units and any shares issued on exercise of the warrants will have a hold period of four months from the date of the Exchange’s final approval (which is expected next week).

Prior to the Reactivation, the Corporation had 29,006,533 issued and outstanding common shares. As a result of the transactions connected with the reactivation, the Corporation will have issued and outstanding 56,256,533 common shares (not including the 1,000,000 shares to be issued to the vendor of the assets in the event such assets achieve their pre-determined revenue target and not taking into effect the exercise of any warrants issued pursuant to the Private Placement). The Agent participating in the Private Placement will be paid a cash fee of 9.1% of the gross proceeds of the Private Placement.

The Corporation will issue a subsequent Press Release upon receipt of Exchange’s final approval and in such Press Release will include a specific date on which its common shares will resume trading on the TSX Venture Exchange.

The TSX Venture Exchange has in no way passed upon the merits of the transactions described herein and has neither approved nor disapproved the contents of this press release.
